

Introduction of the Consulting Program

The consulting program is one of the sub-projects under the ESCP. It is provided for the scholars, the officials and those interested in Europe economy. It presents data, policies and news, European institutions and corporations in China, and the questionnaires of the European companies during the period from January 2006 to August 2007.

In the database, it presents Europe in figures in the level of both macro and micro from 2006 to 2007. Regarding micro data, it includes all kinds of indices of industrial production, costs and confidence; in macro data, it includes the indices of GDP, unemployment and employment, the levels of prices and inflation rate, trade and investment, money supply and interest rate, balance of payments, exchange rate of Euro, public finance.

In the information pool, it presents key publications of EU 2006-2007, policy and news, articles on European integration. These key publications include the official journals, annual reports from different institutions and services, publications offering statistics on a wide range of subjects; policy and news include three main parts such as economy and Euro, financial service, trade and industry; the articles on European integration focus on the integration theory on the aspects of politics, finance, industrial trade and so on.

The list of the European institutions and corporations in China includes the information of the embassies of the European countries in China, the offices of the European institutions and the agencies of the European corporations.

The last part is the questionnaire of the European companies, which contains the basic information about the companies and their staffs.
